DIGITALDESKTOP

Digital Desktop.
Organised information at your fingertips.

Extend your Broking system beyond accounting processes with our fully customisable CRM solution.

Key features include:

- A **document management system** that compliments your broking application.
- **Workflow management tools** to track activities, leads, delegation and reporting.
- **Full customisation** to ensure it integrates with your Broking system and email.
- **Knowledge management** to ensure staff access the most relevant and up-to-date information on clients and leads.

3rdgen.
A powerful content management tool.

3rdgen is a CMS for complex websites and extranets - built for features such as advanced forms, workflow, email campaigns, online schemes and more.

Why 3rdgen?

- Built using Adobe's powerful ColdFusion that allows for fast, agile programming.
- Secure and reliable – passes annual penetration testing in a number of applications.
- Used by clients in a variety of industries -including Steadfast, NIBA, TCorp and more.
- Over 15 years of ongoing development and support.

Powergen.
Simple and affordable websites.

Powergen combines the key features of our custom CMS technology into an easy to use platform for basic websites.

Why Powergen?

- Simple WYSIWYG editor makes content management straightforward.
- Cost effective for small business – licenses are included in our competitive hosting rates.
- Includes email marketing module that can integrate with Digital Desktop.
- Written in Adobe's ColdFusion.
